

TWO-DAY CONFERENCE PROGRAM OUTLINE

Event Description

There currently does not exist a distinct national or international forum that focuses solely on agency transformation towards person centered outcomes. It is hoped that this conference will enable people who are concerned about this challenge to **meet, learn from and collaborate with others who share the same interest.** This may act as a catalyst for future international gatherings on the same theme. All conference participants will have the opportunity to profile their own work on agency transformation online in order to better network with others and to learn about what other people are doing.

A key aim of this conference

is to move towards establishing an ongoing network of like-minded persons and agencies who are interested in person-centered lifestyles and supports. People who are interested in creating and maintaining a wide variety of world-wide contacts with people and agencies interested in person-centered options will be given the opportunity to post their interests, involvement and other contact details on a website specifically designed to enable people and agencies to network. This information will be assembled well before the conference begins thereby making it possible for conference participants to be able to organize meetings or communications with relevant people and agencies both prior to and during the conference.
